RELINE UV TECHNOLOGY in partnership with RELINE UV DISTRIBUTION

UV REHABILITATION VEHICLE

Customized vehicle construction

ECONOMIC SUCCESS THANKS TO SELF-SUFFICIENT OPERATIONS

RELINE's complex vehicle systems are custom-made to meet individual client requirements – ensuring precise and efficient use in trenchless sewer and pressure pipe rehabilitation. These modular solutions are immediately ready for self-sufficient operation and provide all the necessary on-site resources such as high-voltage power and compressed air.

UV REHABILITATION VEHICLE

QUALITY

RELINE vehicle constructions are built for ergonomic and efficient workflows – significantly reducing physical strain on the crew and enabling fatigue-free, safe operations on site. Designed for self-sufficient operation and flexibility the UV rehabilitation vehicles are equipped with advanced UV curing technology and all necessary aggregates. With an intelligent hybrid power system or solar panels CO_2 emissions are reduced to a minimum. Built on a range of trucks, panel vans or Sprinter vans, each vehicle is customized to meet specific customer requirements by a modular setup and can be used either in urban areas or remote environments. These box bodies offer a fully functional, ready-to-use system for efficient trenchless sewer and pressure pipe rehabilitation, wherever needed.

SUSTAINABILITY

- Charging of the battery during the curing process as well as the operation of built-in components
- Optional solar panels: Additonal solar panels charge batteries during operations

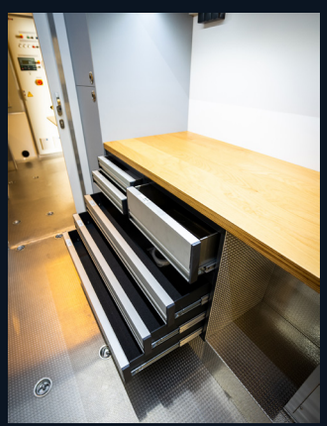

VEHICLE OPTIONS

- Trucks, panel vans or sprinter vans
- 3,5 to – 18 to

CONFIGURATION OPTIONS

- **Workspace:**
  UV rehabilitation system, shelving, and workbench
- **Control Room:**
  UV system control unit, common room, kitchen unit, AC, auxiliary heating, shelving
- **Generator Room:**
  Generator, blower, compressor, shelving
- **Special Room Options:**
  Storage and pump rooms

INNOVATIVE SOLUTIONS FOR SUSTAINABLE WATER NETWORKS

As a global leader in trenchless sewer and pressure pipeline rehabilitation, RELINE not only provides cutting-edge technology for the most challenging requirements, we also offer valuable planning assistance as well as the environmentally friendly execution of your rehabilitation works: A perfect combination that effectively supports the management of resources, time and budget restraints, while simultaneously delivering high-quality solutions which impress through their quality, flexibility and sustainability.
